

Older Kids

Social Skills Group

The “Older Kids” Social Skills group has been developed to support children with friendships and communication, within a peer-lead group. The group is supported and guided by two Speech Pathologists and focuses on developing interaction and social awareness skills. The small group setting allows students to practice skills and encourages the development of friendships within the group.

Group goals will target the following skills:

- Conversations: how to start, maintain and end a conversation appropriately.
- Friendships: how to make and maintain friendships, understanding the different types of friends, understanding the need to talk about other’s interests.
- Language: the need to adapt language to different people and settings.
- Problem solving: social problem solving including, reacting appropriately to situations and interpreting emotions accurately.
- Non-verbal Communication: awareness and importance of non-verbal cues, for example, body language, eye contact, tone of voice.
